PROFESSIONAL SUMMARY

Full-Stack Developer with production experience building end-to-end web applications using React, Next.js , Node.js, and PostgreSQL. Published open-source AI tooling (**archie-cli**, 250+ npm downloads) integrating Gemini with automated git workflows. Proven ability to own the complete development lifecycle, from database schema design and API architecture to performant UI delivery and cloud deployment.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript , Go
Frontend	React.js, Next.js (App Router), Framer Motion, Tailwind CSS
Backend & APIs	Node.js, Express.js, REST API Design, Socket.IO, WebSockets
Databases & ORM	PostgreSQL, MongoDB, Drizzle ORM, Schema Design, Query Optimisation
AI Integration	Google Gemini API, Claude API, Vercel AI SDK, LLM-powered tooling
Auth & CMS	Clerk Auth, JWT, Role-based Access Control, Sanity CMS
Tooling & Cloud	Git/GitHub, Vercel, Docker, ImageKit CDN, CI/CD, Postman, npm publishing

EXPERIENCE

Full-Stack Developer Intern Feb 2026 – Apr 2026
DODOX Studio *Remote*

- Shipped production Next.js client projects end-to-end, component libraries, Sanity CMS schemas, protected API routes, and Vercel deployments, with zero post-launch critical bugs
- Architected Sanity CMS content models decoupling content from application logic, eliminating developer dependency for routine updates across 3+ live production sites
- Implemented Clerk authentication with role-based access control and protected API routes, securing client-specific resources across multiple production environments

Frontend Engineering Intern Dec 2025 – Jan 2026
ACURON Technologies *Remote*

- Shipped 3+ full-stack client projects in React.js and Next.js from scaffold to Vercel deployment, coordinating API integration and data flow across the stack
- Improved Core Web Vitals on legacy projects via lazy loading, dynamic imports, and bundle optimisation, measurably reducing LCP and TTI

PROJECTS

Archie CLI — AI Architecture Docs | *TypeScript, Node.js, Gemini , Commander.js* npm | GitHub | link

- Built and published a TypeScript CLI that auto-generates `ARCHITECTURE.md` for any repo using Gemini 1.5 Pro and git hooks; reached **250+ npm downloads** within days of launch
- Designed a 12-file modular CLI with layered error handling, type guards, and simple-git integration — supporting pre-commit hooks and CI pipeline use cases

Octo — Browser Terminal Sharing | *Go, WebSocket, xterm.js, PTY* GitHub

- Built a real-time terminal-sharing tool in Go using PTY and WebSocket tunneling — enabling shared terminal sessions over a browser URL; deployed on Render

ChalkAI — AI-Powered Whiteboard | *Next.js, TypeScript, Google Gemini AI, tldraw* GitHub

- Built end-to-end AI whiteboard with voice-to-text and sketch-to-diagram conversion; optimised Next.js API routes processing base64 images via Gemini under 2 seconds

EDUCATION

B.Tech in Computer Science and Design Expected May 2027
MET Bhujbal Knowledge City, Maharashtra CGPA: 8.2/10
